SW Engineering CSC648/848 Fall 2021 SFSU Tutors

Team No.7

Alekhya Gnadu (Team Lead): agandu@mail.sfsu.edu

William Lushbough: Github Master

Justin Diones: Front End Lead

Rui Qi Huang: Front End Developer

Rupak Khatri: Front End Developer

Mai Ra: Back End Developer

Milestone 3

Dec 18, 2021

	Date Submitted	Date Revised
Milestone 1	**October 9, 2021**	**October 13, 2021**
Milestone 2	**October 27, 2021**	
Milestone 3	**December 18, 2021**	

Summary of Milestone 3 ZOOM meeting review with Prof. Petkovic and plans for further development

Team number: 7
Meeting date: 11/17/2021

Summary of feedback on UI (list if items, note tat details are available in ZOOM recording)

The first feedback for the UI design in general was that the font is too small and has to change larger text every page and everywhere. we have got rid of the home tab on navbar because we have a logo. Make tabs on the navbar look more like buttons and the search bar should be bigger. In home pages we have to remove book appointments.

In search section, have to make search bar longer, guide the user how to use search, add button to message a tutor, add button to message a tutor and display # of results. We can use prefills after the user clicks on a button after searching.

In the Login/ registration section we have to add the forgot password button and if already a user? We have to put a login button. And finally mark Mandatory Fields using (*).

In the tutor dashboard we should separate a tab for messages that they have received and a tab for the tutor to post. In the tutor app, the title should be matched with a navbar link and get rid of the major dropdown.

Summary of feedback on code and architecture
We have to fix some bugs. We have to put header comments in code scripts.

Summary of feedback on github usage
It will be better if we put commit messages in every time we push to git from local. And should write more comments and header or inline. In command we should explain what code does to understand what and why we push to git between the group.

Summary of feedback on DB
We have to clean up the user tables and have to add password/ encryption to our database for security. There should be no roles or no students, only just users should be there.

Summary of feedback on teamwork
We have a good job in team work. There is no particular command for the teamwork feedback.

Any other comments and issues

We have to add forgotten Password Dummy Link to the login page and do not use red in application. Finally we have to fix image size. We should have a major in the pull down menu, should have 'How many Found' in search results and search results look the same

Check Point (CP) given, DUE: 12/18/2021
